☑ ☁️ iCloud ⓘ
   ⦿ Include CloudKit support (requires Xcode 6)   Edit   Enabled iCloud Containers (1)
   ◯ Compatible with Xcode 5

iCloud Container Assignment

Select the iCloud you wish to assign to the bundle.

☑ Select All	1 of 1 item(s) selected
☑ Imfolio iPhotos Portfolio	iCloud.com.imfolio.imfolio

☑ 👤 Sign In with Apple ⓘ   Edit   Enable as a primary App ID

Sign In with Apple: App ID Configuration

If you're enabling an App ID for the first time or for a new app, enable the App ID as a primary. You can use primary App IDs on their own or to enable identifiers for related apps and websites through grouping. To enable an App ID for a related app, (for example, an App ID for the iOS version of your Mac app), group it with the existing primary. This will also ensure that users only need to provide consent to share their information with you once for each group of apps and websites.

⦿ Enable as a primary App ID
◯ Group with an existing primary App ID

Server-to-Server Notification Endpoint

Sign in with Apple server-to-server notifications allow you to receive important updates about your users and their accounts. Notifications are sent for each app group when users change mail forwarding preferences, delete their app account, or permanently delete their Apple Account. Each group of apps can have one URL, which must be absolute and include the scheme, host, and path. TLS 1.2 or higher is required to receive notifications. Learn more.

Example: https://example.com/path/to/endpoint

Web Authentication Configuration

Use Sign in with Apple to let your users sign in to your app's accompanying website with their Apple Account. To configure web authentication, group your website with the existing primary App ID that's enabled for Sign in with Apple.

Primary App ID   1 App ID

Imfolio Photography Portfolio (658755FGQ3.com.imfolio....   ✕   ⌄

Website URLs +

Provide your web domain and return URLs that will support Sign in with Apple. Your website must support TLS 1.2 or higher. All Return URLs must be registered with the https:// protocol included in the URI string. After registering new website URLs, confirm the list you'd like to add to this Services ID and click Done. To complete the process, click Continue, then click Save.
